Direct Reporting Line: Quality Manager
Position: 32/40h per week

Job summary:

The Quality officer is part of the QA/QC team, which ensures that the products Phageguard provides are fit for purpose, are consistent and meet both external and internal requirements with respect to Quality and Food Safety. This includes legal compliance and customer expectations. The Quality Officer supports the Quality Manager in Quality Assurance and Quality Control activities.

Tasks and responsibilities:

- Support the implementation, maintenance and continuous improvement of the Quality Management System in accordance with FSSC 22000 and FDA requirements
- Assist in maintaining compliance with external standards (FDA, Halal, Kosher and Organic).
- Responsible for reviewing and monitoring of QC results
- Coordinate end-product analysis and support the product release process
- Review of batch documentation
- Maintain and update quality documentation (SOP, WI, forms)
- Follow-up of incidents, deviations, CAPAs and change controls.
- Provide support to various departments on quality and food safety-related topics.
- Support customers, regulatory and certifying bodies request related to quality and food safety
- Responsible for training quality personnel on procedures and work instructions
- Assisting in both external and internal audits

Background:

- A completed BSc or MSc education Food Technology and Quality
- Experience with FSSC 22000 or equivalent (BRC/IFS/ISO 9001) is desired
- Good command of English language, understanding Dutch is nice but not essential
- Accurate & eye for detail. Affinity for quality. Pro-active, team player taking ownership for personal and organizational responsibilities

What do we offer?

- Competitive salary and benefits package.
- Opportunities for professional development and career growth.
- A dynamic, international work environment with many nationalities with a collaborative and supportive management team.

Procedure:

Is this the role you're looking for? Do you want to be part of a unique biotech scale-up consisting of a young and dynamic team and make an impact in improving food safety?

Our Phageguard team looks forward to receiving your CV and cover letter via [**careers@phageguard.com**](mailto:careers@phageguard.com)

Please only apply if you are eligible to work in The Netherlands.

- Please provide a CV and motivation letter prior to August 14, 2026
- We'll invite the selected candidates for a 1st introduction meeting at our facilities in Wageningen in the period of August 24 – September 5, 2026

Company profile:

Phageguard is a Dutch biotechnology company, pioneer and market leader in the development of antibacterial Phage technology. Phage solutions are applied on the surface of food products such as Ready to Eat meats, cheese, salmon, fruits and vegetables.
